

WS19

The 19 set was the main radio used by the Army during WW2
It was used in all types of vehicles including tanks.

It used 2-8 mhz Short Wave, Voice and Morse
Some sets had a VHF "B" set for short range 1000Yards Coms.

The sets were developed and manufactured by PYE
Later in the war, sets were made by the Canadians on lease lend
Our allies the Russians, had sets with Russian writing on them

For longer distance Coms. a amplifier was added. WS19HP
Add on control boxes were used for multi operator's used in Tanks
The 19set could be connected to long telephone wires to HQ
Most 19 sets also had an intercom circuit for inter Tank Coms.

The sets were often repaired in the field as above
The 19 set was reliable and rugged and helped us win the War
